4	59326587 ABC	23.55	0948	0955	1020	1025
5						
6			1042	ETA		
7						

8 This is an example of how a haul sheet needs to be filled out, on a normal work day.

9 Mr. Otto wants the ETA (estimated time of arrival) written in the arrival column and ETA written in the departure column under loading.

10 You must fill out the Customer and Contractor lines

11 You must fill out the Load site and Dump site lines

12 Make sure you put the correct date on your haul sheet

13 You need your truck number and trailer number on the haul sheet

14 You need your employee number and name printed on the Employee Name line

15 You need to sign your name on the Driver Signature line at the bottom of the page.3

16 If the job has an order number for it write it in Comments towards the right side.

17 You must fill out the job number if we have a job number made for the job.

18 If we have a job call in during the day and do not have a job number made, write in the comment section that dispatch did not have a number made yet.

19 These are Mr. Otto's paychecks and he feels they are getting very sloppy. Each customer gets a copy of your haul sheet. We have to rewrite your haul sheets if he thinks they are not presentable to the customer. Try the best you can not to turn in haul sheets that have gotten wet from spilled coffee, water or the dirt and diesel on them.

COMMENTS NO DELAYS ALL DAY Order # 70
